# ABOUT GREE

Gree Electric Appliances, Inc. of Zhuhai was founded in 1991 and was listed on the Shenzhen Stock Exchange in November 1996. At the beginning, Gree was only a company that assembled residential air conditioners. Now it has grown into a diversified global technological industrial group that has expanded its business to air conditioners, home appliances, high-end equipment and communication equipment under three brand names: GREE, KINGHOME and TOSOT. Gree is the number one brand of air conditioners in the world in 2019\*.

2005: Gree has topped No.1 in production and sales volume of residential air conditioners for 14 consecutive years.  
2015: Gree's sales revenue exceeded 15.08 billion USD.  
2016: Gree's sales revenue exceeded 16.51 billion USD.  
2017: Gree's sales revenue exceeded 22.21 billion USD.  
2018: Gree entered into the list of Forbes Global 2000 again and ranked No. 294, moving up 70 places compared with the previous year.  
Gree's sales revenue exceeded 30.23 billion USD.  
2019: Gree entered into Fortune Global 500. Gree's return on equity (ROE) ranked the first among the 129 Chinese enterprises on the list.  
2020: Gree has ranked the 436th on the list of Fortune Global 500.

Thanks to 400 million users' choices, Gree brands are sold widely to more than 160 countries and regions.

Action makes the future and innovation makes achievement. Looking forward, Gree will press ahead with its business philosophy of passion, innovation and realization. We aim to build a centenary air conditioning enterprise and create a better life for humankind.

\*Gree is the number one brand of air conditioners in the world in 2019

| <b>65</b> | Control System   |

## SOME PARTS

-  **Golden fin condenser**  
Anti-corrosive performance of golden fin is 3 times better than normal fin.
-  **Inner groove copper**  
Special thickened inner groove copper tube enhances heat exchanging performance.
-  **Built-in drain pump**  
The drain pump can pump the condensation to a high level. It facilitates condensation draining from the indoor unit and makes the installation of indoor unit easier.
-  **Washable filter**  
Filters are easy to dismantle and install. You can use dirt collector or water to clear away the dust.

-  **Quality motor**  
Quality motor makes operation steady and in low noise.
-  **Auxiliary electric heater**  
Auxiliary heater greatly improves heating capacity and saves energy.
-  **Slave and master wired controller**  
One indoor unit can be connected with two wired controllers to realize controlling of the same indoor unit from different control points.
-  **Long connection pipe design**  
The total length of connection pipe reaches 1000m, which greatly improves the project flexibility of the unit.

## COMFORTABLE & HEALTHY

-  **Vertical swing**  
Air discharge flaps can move vertically for efficient air and temperature distribution throughout the room.
-  **Horizontal swing**  
Air discharge louver can move horizontally for efficient air and temperature distribution throughout the room.
-  **Anti-cold function**  
The indoor unit will not blow in the winter if the air is not warm enough.
-  **Turbo function**  
To run with strong power and make you feel comfortable(cool or warm) quickly.

-  **Fresh air supply ventilation**  
The unit can introduce a certain percentage of fresh air to satisfy the fresh air requirement.
-  **Comfortable sleeping mode**  
The setting temperature and the indoor noise can be adjusted to a more comfortable level when you set the "sleeping mode".
-  **Quiet function**  
Unit is ensured to operate with the lowest noise by ultra-low fan speed and auto adjustment according to system parameter.

## HIGH EFFICIENCY & ENERGY SAVING

-  **High efficiency**  
The air conditioner is designed to high energy efficiency and to realize power saving.
-  **Intelligent defrosting**  
It performs defrosting intelligently when necessary, thus improving heating efficiency and saving energy.
-  **Energy saving function**  
When this function is activated, the temperature setting is only in limited range, so as to save energy.
-  **All DC inverter technology**  
All motors adopt DC inverter technology, which greatly improves energy efficiency.

## CONVENIENCE

-  **Memory function**  
Unit is able to remember the operations before power failure and automatically returns to those operations when power restored.
-  **Compact design**  
Unit is designed with smaller dimension, which is easy to install and transport, and saves the cost.
-  **Easier maintainability**  
The unit is designed to be easier for maintenance and component replacement.
-  **Auto addressing technology**  
The new generation of indoor unit applies auto addressing technology, which greatly reduces project debugging time and error rate.

## RELIABILITY

-  **Auto clean**  
After turning off unit, the indoor fan will keep running in low speed for a moment to dry the inner components and parts, in order to prevent mildew and keep users healthy.
-  **Self-diagnosis**  
Malfunction codes are shown on the display panel for fast and easy maintenance when any problem occurs.
-  **Low voltage startup**  
Unit is able to safely start when voltage is below standard.

-  **Low temperature heating**  
Unit is able to start and operate in normal when the ambient temperature is lower than -20°C and heating capacity remains still.
-  **Modular operating**  
Several units can operate together as modules, so that capacity output control is more precise, and also higher reliability.
-  **Comprehensive protection**  
The unit is designed with various of protection functions to ensure the reliability.

## VERSATILITY

-  **High ESP**  
The external static pressure range is higher, which ensures longer delivery distance for air to provide powerful cooling.
-  **Wide voltage range**  
The unit can operate in a wide range of voltage, greatly reducing the impact of voltage fluctuation.
-  **Wide operation range**  
Unit can operate in wide range, greatly reducing the ambient temperature limitation.

-  **Multi fan speed**  
The fan can operate with multi speeds and satisfy different air flow volume requirement.
-  **Modular structure**  
High efficiency compressor presents reliable performance.

## CONTROLLER

-  **24 hour timer**  
Unit can be set to turn on or turn off at anytime in a day.(The timing interval is 5-minute.)
-  **Weekly timer**  
Unit can be set to start heating or cooling anytime on a daily or weekly basis.
-  **°C/°F switch**  
Under status of unit off, press MODE and "-" buttons simultaneously to switch °C/F.
-  **Clock display**  
Time is shown on remote controller .
-  **Child lock**  
It avoids child's wrong operation on the remote controller.
-  **Key-card control**  
The key-card control function is specially designed for the hotel rooms. By removing the key-card, the air conditioner can be automatically switched to stand-by status.

-  **Centralized control**  
Start, stop and regulate the air conditioner from a distance.
-  **Long-distance monitoring**  
Long-distance monitoring enables the unit to be controlled and monitored from a long distance.
-  **Shield function**  
Remote control the indoor unit and shield the functions of wired controller which include ON/OFF, temp or mode setting, energy-saving function, etc.
-  **Human engineering operation**  
Adopts the technologies of auto addressing, non-polar communication and auto debugging, which improves project efficiency.
-  **Floor heating debugging**

## GMV5 Heat Recovery

GMV5 Heat Recovery System embodies the excellent features of GMV5(DC inverter technology, DC fan linkage control, precise control of capacity output, balancing control of refrigerant, original oil balancing technology with high-pressure chamber, high-efficiency output control, low-ambient temperature operation technology, sub cooling control technology, superheating technology, high adaptability for engineering, environmental refrigerant). Its energy efficiency is improved by 78% in comparison with conventional multi VRF.

- All DC inverter technology. All DC inverter compressor is used in this system. It can directly intake gas to reduce the loss of overheat and improve efficiency.
- 0.33In.W.G wide application location.
- Advanced control functions.
- Better reliability.
- Wide operation range: cooling: 23°F~125.6°F(-5°C~52°C); heating: -4°F~75.2°F(-20°C~24°C); cooling and heating: 14°F~68°F(-10°C~20°C).

# GMV MTAC

GMV MTAC is a concealed VRF unit without front air discharge and air return, which can reduce the noise. It's mainly developed for the North American market, which is applicable for apartments, offices, hotels and other areas. The unit adopts deep subcooling technology for ensuring the quiet cooling operation. Moreover, the unique drainage control technology has solved the problem of water drainage of the outdoor unit under a low-temperature environment.

High efficiency

Low temperature heating

Golden fin condenser

Quality motor

Easier maintainability

Low voltage startup

- The system adopts all DC motor, which greatly improves efficiency. The energy efficiency for all Gree DC units is increased greatly. SEER=16.5, HSPF=9.5.
- The latest communication way-CAN bus communication is adopted, which greatly improves anti-interference ability, precisely controls the indoor units and improves the reliability of the system. Meanwhile, a specialized shielded wire is no longer needed, while conventional communication wire can be used to increase the flexibility of project installation.
- The system can operate constantly and reliably in a wide temperature range(cooling: 23~118.4°F/-5~47.8°C, heating: -4~80.6°F/-20~27.2°C), which is not affected by an atrocious environment.
- A series of optimized measures are taken to solve the problem of indoor unit's throttling sound, indoor unit's oil return noise, gas bypass noise during start-up, which improves the comfort of the system.
- The system applies the original technology of PID intelligent capacity adjustment, which quickly and precisely controls indoor ambient temperature according to set temperature, with small temperature fluctuation and great comfort.

# WATER-COOLED GMV

---

# GMV Water

Water Source Heat Pump VRF System integrates the advantages of a water system and DC inverter VRF units. It features the high efficiency and energy saving of water-cooled units and the comfortable and flexible characteristics of VRF units. It utilizes renewable sources as the heating and cooling sources. It can be used in coordination with relevant policy projects or energy conservation projects, providing a new air conditioning solution for tall building structures, hotels, office buildings, shopping centers, etc.

6/8/10 Ton

	High efficiency
	Energy saving function
	Quiet function
	Wide voltage range
	Wide operation range
	Modular operating
	Comprehensive protection

- An external energy source for water source heat pump VRF system

Gree self-developed water source heat pump VRF system utilizes renewable sources such as water and geo-thermal or ground, with higher operating efficiency and lower energy consumption. The waterside can be a cooling tower or boiler or the application of surface water (river water, lake water, seawater), groundwater, geo-thermal or ground heat, solar power, waste heat, wastewater or other kinds of renewable sources.

- System structure of water source heat pump VRF system

The water source heat pump VRF system is made up of two parts. The first part is the water system that exchanges heat between outdoor units and water/geo-thermal or ground sources. The application of water source/geo-thermal or ground source is varied and can be coordinated with constant-temperature water/geo-thermal or ground, cooling tower or boiler. Compared with the common air-cooled system, it is more energy-saving and space-saving. The second part is the VRF system of outdoor and indoor units, which features the advantages of flexible installation, easy construction, and intelligent control. There is a variety of combinations of indoor units to cope with different applications.

- Suitable for different construction applications, no influence on building appearance

The water source heat pump VRF system is suitable for different constructions, with no influence on building appearance. The water source heat pump VRF air conditioners do not need to exchange heat with the outdoor air, so it can be installed flexibly to coordinate with the building structure.

- No influence of weather

The water source heat pump VRF system exchanges heat with water or geo-thermal or ground source through outdoor units, so it won't be affected by the air temperature. In winter, when the system is in the heating operation, outdoor units won't get frosted or run in defrosting mode, so as to guarantee stable heating performance.

- Same as GMV5, the water source heat pump VRF system adopts CAN communication, so it can be connected with any one type of GMV5 indoor units.

Max. piping length (m(ft.))	GMV Water

Compressor operating range	%~%	20%~100%				
Compressor type×quantity		Scroll×1				
Refrigerant		R410A				

Note:

1.Nominal capacity based on 25ft. of equivalent refrigerant piping with 0ft. level difference.  
Cooling: Indoor temperature 80°F/27°C DB, 67°F/19°C WB; entering water temperature 66°F/30°C.

Heating: Indoor temperature 70°F/26°C DB, 60°F/16°C; entering water temperature 68°F/20°C.

2.Rated per AHRI 1230 Standard conditions.

3.GMV water heat pump should be placed at the ambient temperature of 50°F~122°F(10~50°C).

4. All models of this series are under development. Please confirm the final specifications with the sales representatives.

5. The Water Heat Recovery series and the Water Heat Pump series are the same models.

# GMV5 Solar

# GMV5 Solar Generation II

Gree GMV5 Solar Generation II adopts inverter compressor technology, with capacities ranging from 3 tons to 10 tons. It has a broad product lineup and is widely applicable to places such as residential houses, apartments, and office buildings.

- With LAN reverse power control technology; efficiency of PV power generation/consumption is more than 99%.
- Active grid configuration, automatically identifying 208/240V and 60Hz and other global power supply type.
- Adopt a high-efficiency DC inverter compressor for realizing broadband operation, high efficiency and low noise.
- Adopt all-new aluminum-plastic design, with stronger heat dissipation capability and longer service life (components).
- Adopt modular design concept for the unit's structure to realize fast-assembly as well as fast-disassembly for all parts.
- The built-in smart energy control module can freely connect to Gree self-developed Information Energy Management System (IEMS) for smart energy distribution.
- This function is upgradeable. An energy storage unit is optional. The upgrade from PV air conditioning to PV storage air conditioning should match with our energy management system solution.

# Ultra Heat GMV

---

# Ultra Heat GMV

Gree Ultra Heat GMV adopts a multi-cylinder EVI compressor to ensure strong heating capacity. Its EER reaches 13, with a capacity range from 36K to 192K. It has a broad product lineup and is widely applicable to places such as residential houses, apartments, and office buildings.

36/48K

72/96K

XK46

YAP1F

High efficiency

Golden fin condenser

Turbo function

Low temperature heating

Centralized control

Long-distance monitoring

- SEER is 20.5 and HSPF up to 11.7, certified with NA Energy Star

- The capacity ratio of indoor and outdoor units is 50%~100%

- Highly efficient DC inverter control technology adopted

- With CAN communication technology, connectable to GMV5 indoor units

- Stable operation under -31°F/-35°C
- 34 indoor units connectable in maximum
- Heating performance is not weakened even at -4°F/-20°C

## ► Super High Static Pressure Duct Unit

- **High static pressure design**

Static pressure can be up to 275Pa(1.1 In.W.G), especially suitable for places in need of long distance airflow.

- **Convenient installation**

You can choose circular air duct or rectangular air duct according to actual needs. Or you can choose different ways of air return.

- **Easy maintenance**

The system has maintenance window for easy maintenance.

- **Protection function**

Anti-freezing protection, fan motor overload protection, temperature sensor malfunction protection.

## General Static Pressure Duct Unit

- Medium static pressure design with multiple static pressure levels for your option**

External static pressure design reaches 80Pa (0.3In.W.G) for multiple air supply areas and long air supply distance, satisfying various layout requirements. With five external static pressure levels, convenient for engineering design and application.

- DC motor design with energy-saving and quiet operation**

DC brushless motor is adopted to achieve stepless adjustment of rotation speed, more stable speed adjustment and quieter operation.

- Intelligent drain device without height limitation**

DC drain pump is equipped with a maximum lift height of 1m, solving the condensate drainage problem caused by small installation space and saving the installation space.

- Multiple protections function**

Water-full protection, freeze prevention, abnormal temperature sensor protection and built-in fan overload protection, etc.

## Low Static Pressure Duct Unit

- Low static pressure, low noise**

Especially suitable for rooms of compact structure or small installation space. Moreover, it provides you with a comfortable and quiet living environment.

- Intelligent drainage device**

Water height difference up to 1.2m(3-15/16ft.), which can effectively drain out condensing water and save space.

Note: Please specify if you need this function.

- Convenient installation**

Tab type plastic filter, detachable fan motor, independent water pump assembly and electric box assembly, all for convenient maintenance.

- Protection function**

Water overflow protection, anti-freezing protection, fan motor overload protection, and temperature sensor malfunction protection.

## ▼ 360° Air Discharge Cassette Indoor Unit

### ● 360°Air supply

360 ° air supply design to make indoor airflow more even and temperature distribution more comfortable to avoid any blind angle.

### ● Individual swing control

Individual swing control of four air guide louvers to set fixed supply air or swing supply air in different angles individually, satisfying the user's individualized requirements on temperature and air flow distribution in different indoor locations, thus enhancing comfort.

### ● Lifting water pump of condensate

With direct current drainage pump, the operation noise is lower and the lift reaches 1.2m (47-1/4 inches).

### ● Fresh air function

With the healthy fresh air accessories, it can bring in 8%~10% of fresh outdoor air effectively, improving the air quality of the indoor unit.

### ● I-feel technology\*

Advanced I-feel technology can detect human indoor activities in real time and realize intelligent control to the operation status of the indoor unit, thus reaching a higher energy conservation level.

Note: \* This function is custom-made.

## ▼ Fresh Air Ventilation Kit

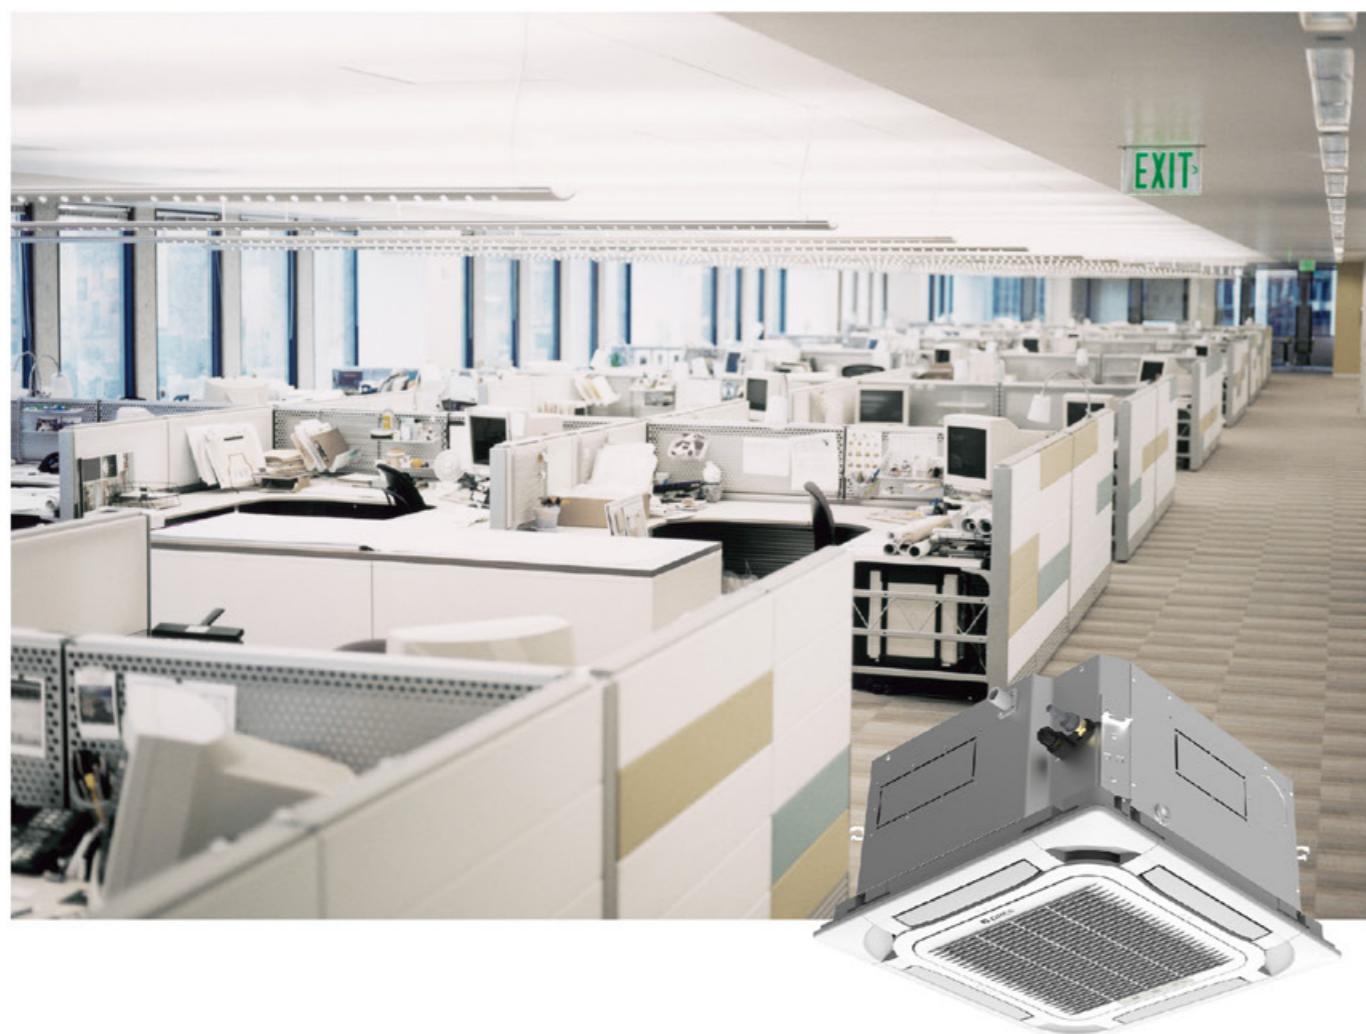

### ● Fresh air quality

The fresh air device operates by matching with 360° air discharge cassette indoor unit, supplying indoor side with outdoor fresh air to improve indoor air quality and then let users enjoy the fresher air.

### ● Beautiful appearance

With a beautiful and elegant outlook, it can match with a 360° air discharge cassette unit for operation.

## 360° Air Discharge Compact Cassette Unit

- **360° Air supply**

360°air supply design for wide air supply range and balanced temperature distribution, more comfortable.

- **New air duct and blade design for low noise**

Adopt new air duct and blade with fluid simulation design for lower noise; noise is as low as 25dB.

- **Independent swing control**

4 swing blades can be controlled independently; multiple air supply angle combinations are available for free and humanized control, avoiding direct air blow to people.

- **DC quiet drainage pump**

The water height difference is up to 1.2m (47-1/4 inches), which can effectively drain out condensing water and save space. High-lift DC quiet type drainage pump reduces power consumption and improves sound quality; the maximum lifting height is 1.2m (47-1/4 inches); installation is more flexible and the drainage pipe layout is more convenient.

## 2-way Cassette Unit

- **Compact Design**

The new generation of two-way cassette unit has a very thin body (11 inches), which is 11.1% thinner than the last generation. Therefore, it requires less installation space and is more practical in engineering.

- **Independent Air Swing**

There are two air deflectors that can be controlled independently to adjust the air supply direction. They can make different combinations of air swing angles to avoid direct airflow to people.

\* It must be used with the wired controller (XE70-33/H).

- **Intelligent Drainage**

It is equipped with a highly efficient DC quiet type condensate pump. The water drop difference is up to 1.2m (47-1/4 inches), which can effectively discharge condensate in case of narrow installation space. Thanks to the DC quiet design, the pump is able to operate quietly.

Note: This series is under development.

- **Brand New Panel**

The new generation of two-way cassette unit adopts a brand new front panel design, making it visually pleasing and perfectly fit into indoor decoration.

- **Horizontal + Vertical Air Supply**

The front panel adopts an arc design for the end of air deflectors. With structural simulation analysis, the best air supply angle was simulated. In cooling mode, the unit can achieve horizontal air supply to avoid cold air draft to people. In heating mode, it can achieve vertical air supply to improve the degree of heating comfort.

## 1-way Cassette Indoor Unit

- Small installation space**

With 185mm (7-1/4 inches) ultra thin design, the unit can be installed in a 19cm deep ceiling.

- Detachable grille and long-life filter**

A grille is detachable for easy cleaning. With durable filter, the cleaning cycle is 20 times longer.

- High drain pump lift**

Drain pump lift reaches 1.2m (47-1/4 inches), which can effectively drain out water.

- Protection function**

Water overflow protection, anti-freezing protection, fan motor overload protection, temperature sensor malfunction protection.

## Wall-mounted Type

- Comfortable and balanced airflow, up&down air outlet**

Up air outlet: In cooling, cool air blows out horizontally and then gradually drops.

Down air swing: In heating, warm air blows downward and then gradually climbs up.

- Triple defenders for better purification**

Mildew-proof filter, electrostatic fiber and anti-biotic fiber adopted to remove dust, smell, bacteria and mildew.

- Cold air prevention design**

During heating in winter, cold air prevention function is enabled so that air won't be blown out until it's warm.

- Multiple protections**

Anti-freezing protection, temperature sensor malfunction protection, fan motor overload protection.

## Console

- **Multiple fan speed**

The fan can operate in multiple speed and satisfy different airflow volume requirements.

- **Detachable grille and long-life filter**

A grille is detachable for easy cleaning. With long life filter, the cleaning cycle is 20 times longer.

- **Protection function**

Anti-freezing protection, fan motor overload protection, temperature sensor malfunction protection.

## Floor Ceiling Type

- **Ceiling or floor mounted, flexible installation**

The unit can be ceiling or floor mounted. When floor mounted, a suspended ceiling is not needed.

- **Beautiful appearance**

With beautiful and elegant front panel, it is congenial to the indoor surroundings.

- **Protection function**

Anti-freezing protection, temperature sensor malfunction protection, fan motor overload protection.

- **Horizontal and vertical air swing**

Wider air swing range for your comfortable working and living environment.

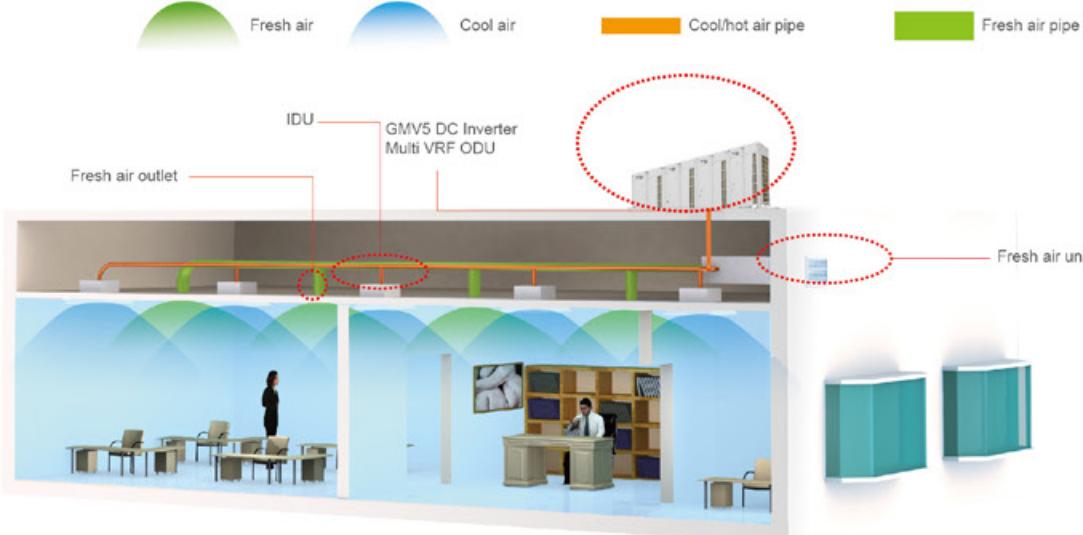

## Fresh Air Processing Unit

Airflow volume: 589~2060CFM; cooling capacity: 42~96 kBtu/h.  
Applicable to all kinds of structure.

### One system, two functions

- By adopting DC inverter technology, Fresh Air DC Inverter Multi VRF System features air conditioning function and fresh air function.

### Enjoy fresh air

- Airflow volume: 589~2060CFM; cooling capacity: 42~96 kBtu/h  
Applicable for all kinds of structure.
- Direct evaporative cooling adopted, air conditioning+fresh air can be realized accurately and precisely.
- DC inverter technology adopted, constant humidity is enabled with less power consumption.
- Integrated system control with Gree GMV Multi VRF System.

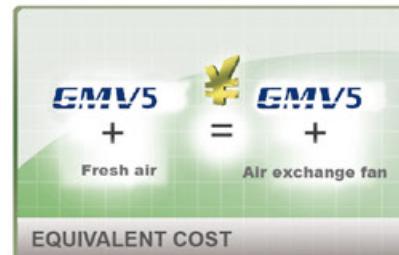

### Air conditioning and fresh air, two in one

#### Less investment

Fresh Air DC Inverter Multi VRF System can be combined with Gree GMV5. For the same room, if the same amount of fresh air is to be taken, then the cost of GMV5+Fresh air unit is equivalent to the cost of GMV+Air exchange fan.

#### Less operation cost

The unit can control refrigerant output according to actual needs to ensure constant airflow temperature. By adjusting power output, light-load but high power operation can be avoided. Thus, operation costs can be greatly reduced.

## Air Handler

#### Highly flexible installation

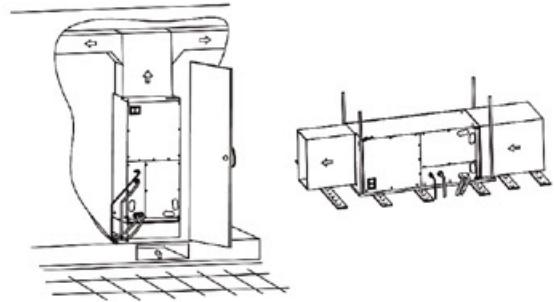

Installation space for this unit is small, allowing easy installation and maintenance. The unit can be installed on the ground or on the roof of the building, which means the installation is totally flexible depending on the project requirement.

#### Cold air prevention design

When heating in winter, cold air prevention function is enabled so that air won't be blown out until it's warm.

#### Long life and washable filter

The filter is easy to be dismantled and installed. You can use a dust collector or water to clear away the dust.

## AHU KIT

- With functions and advantages of the VRF unit.
- Multiple installation methods, convenient for project design.
- Independent design, convenient for installation.
- With a wide capacity range.
- Error signal connected, safe and reliable for operation.
- Take the outdoor unit of VRF unit as the cold and heat sources, no need extra cold and heat sources.
- Dual control methods: general indoor unit control or fresh function control for selection.
- AHU KIT can connect the third-party controller to realize many functions for the complete system, such as switchover among different modes and temperature setting.

# Control System

---

# Control System

## VRF Selector Ultimate

A model selection system is a necessary tool for the sales of the VRF system in the overseas market. In order to meet the demand of the overseas market for the model selection system, the competitive strength of Gree products in the overseas market has been improved. Gree provides clients with intelligent, fast and multivariate model selection systems.

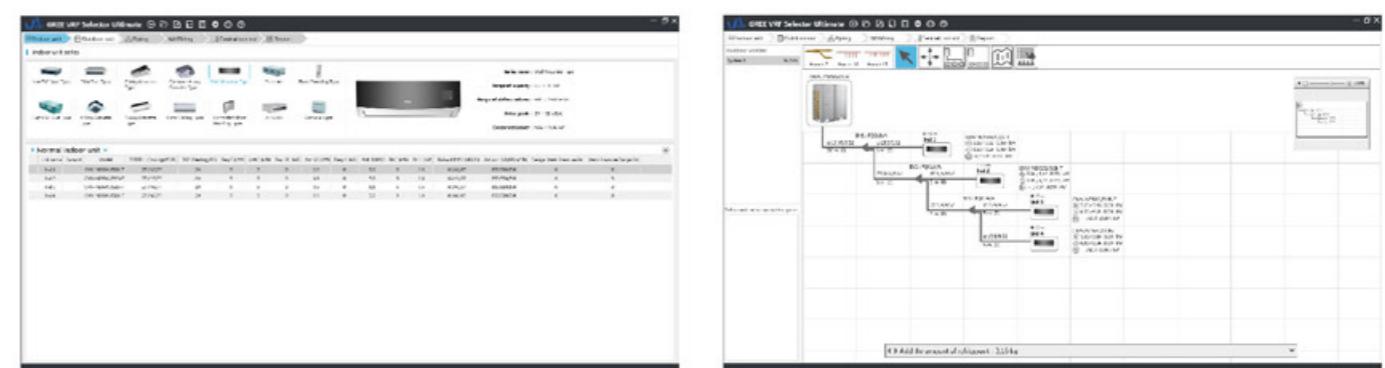

### Intelligent Model Selection

- 1) The system will take multiple aspects into consideration to provide clients with the optimal plan by combining performance, noise, comfort, reliability, cost, etc.
- 2) It can calculate according to user demand, ambient temperature, using location, static pressure, etc. to recommend the suitable IDU, ODU and pipe arrangement. It will check by combining the collocation rate, pipe arrangement, etc. of the whole system, and automatically adjust the unit model to get the optimal model selection plan.
- 3) Using habit and using standard differs in different regions. The intelligent model selection system will conduct a special process according to metric/inch system, unit parameters, different language systems in different regions.
- 4) It will conduct automatic checking for the whole system. If anyone of the conditions cannot satisfy the user demand, the software will automatically calculate to find a suitable unit and pipe arrangement.

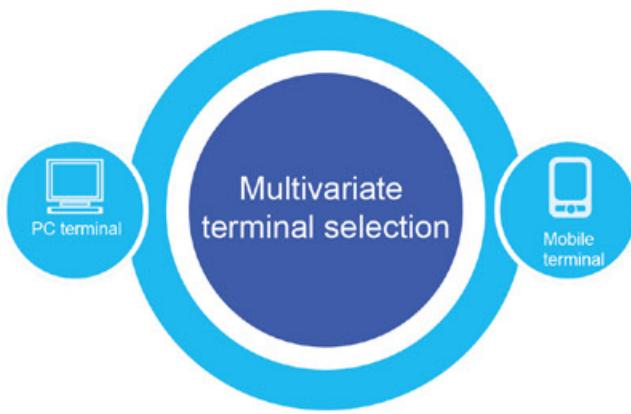

### Fast Model Selection

The software can provide users with audio-visual model building experience via a visible modeling method. Through the intelligent fast connection, multiple parts of VRF can be correctly and fast linked, which can greatly improve the modeling efficiency.

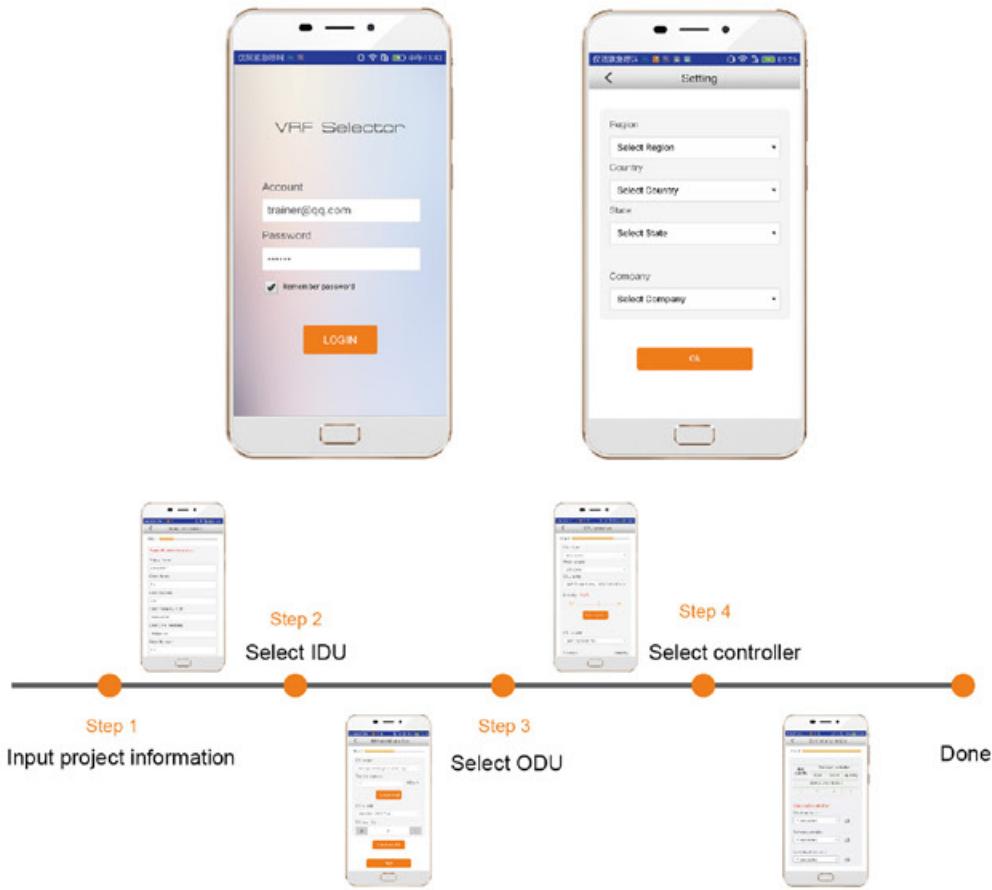

## Multivariate Model Selection

The model selection system will launch multiple model selection terminal applications around the core of model selection parameter data according to different user groups. The model selection data can achieve data resource sharing on the basis of a cloud server, which can provide different terminal users with standard and professional model selection service.

## Mobile APP model selection

The mobile APP model selection user terminal, which is developed by using cross-platform technology and can be embedded in other APP to use. It supports multiple units for selection and two basic languages: Chinese and English, making the software more user-friendly.

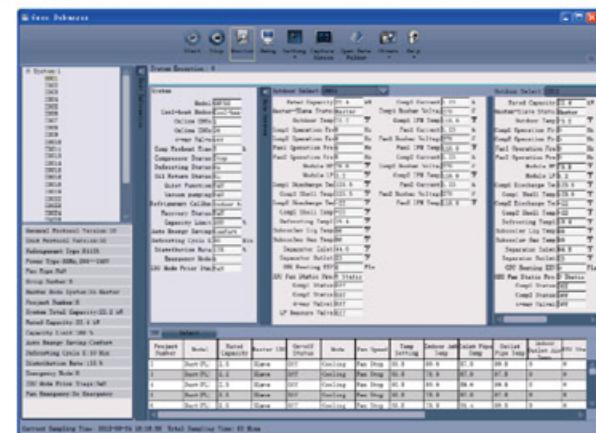

## Intelligent Debugging Software

GMV5 offers intelligent debugging software to the end-users for faster construction needs.

### Monitoring functions

- Fully control the operation status of each device of the system;
- Hover the mouse over the parameter to display its remarks.
- The online devices will be displayed in a tree structure;
- Display the information of the air conditioner in divided regions;
- Each display region can be moved or concealed;
- Display updated status of units in real-time;

### Control functions

- Control the operation of the unit as you like;
- Comprehensive control of outdoor unit, indoor unit, water tank, hydro box, etc.;
- Real-time display of current status or status after being controlled;
- Both single control and group control are available.

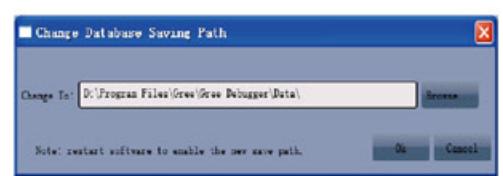

### Project debugging functions

- One-click and automatic project debugging;
- Project debugging is arranged step by step from left to right;
- Manual intervention and skipping of some debugging phases are available.
- Green icons will be displayed for the items finishing debugging; red icons will be displayed for the items having debugged exception; light yellow icons display debugging information;

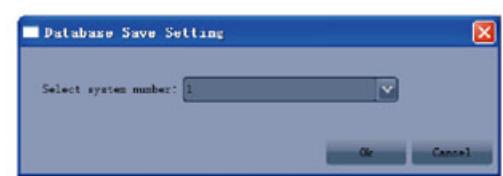

### Auto data-saving function

Data will be saved automatically. The database saving path can be changed or data documents can be generated repeatedly.

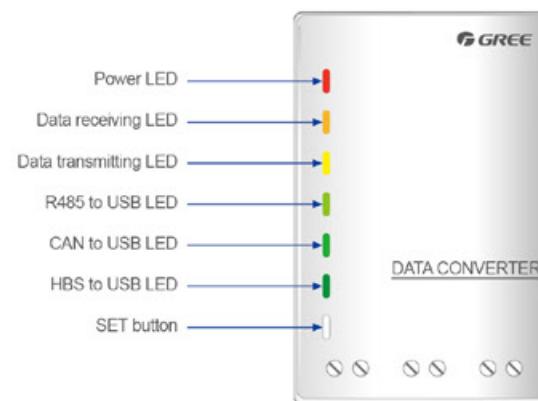

Step 1: Change Database Saving Path

Step 2: Database Save Setting

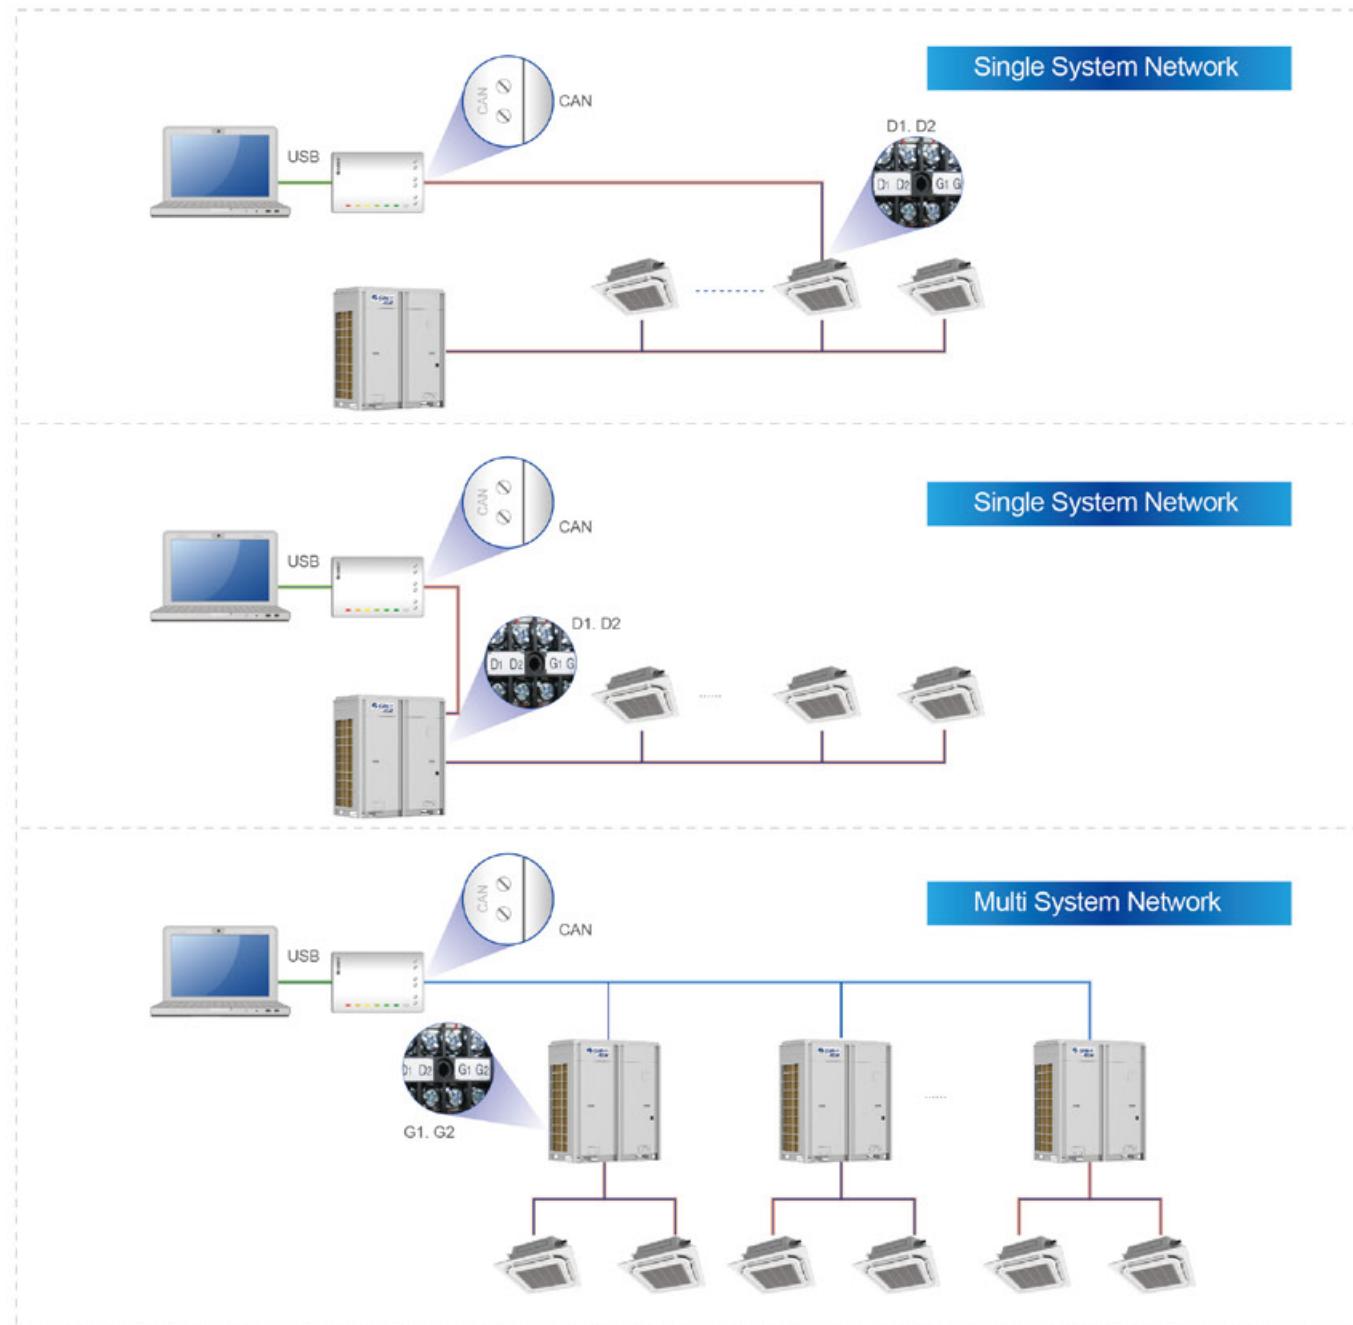

## USB data converter

Users can use USB data converter to freely convert CAN/HBS/RS485 data into USB data, achieving data interchange between computer and air conditioner.

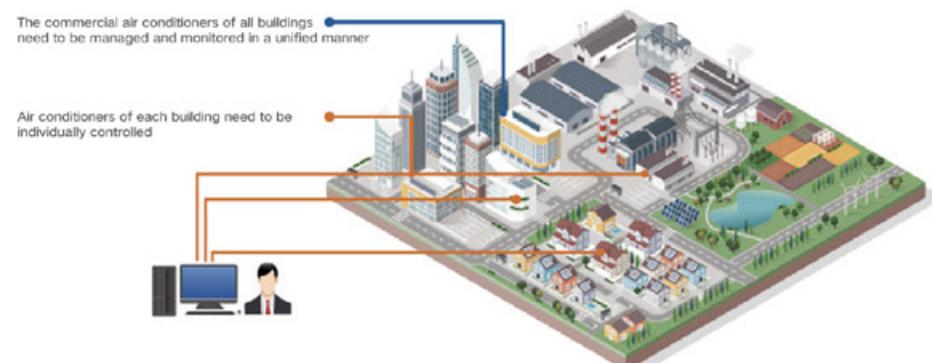

## Auto direction of connection way

The wiring diagram will direct connection way automatically, so that the user can get the connection way quickly.

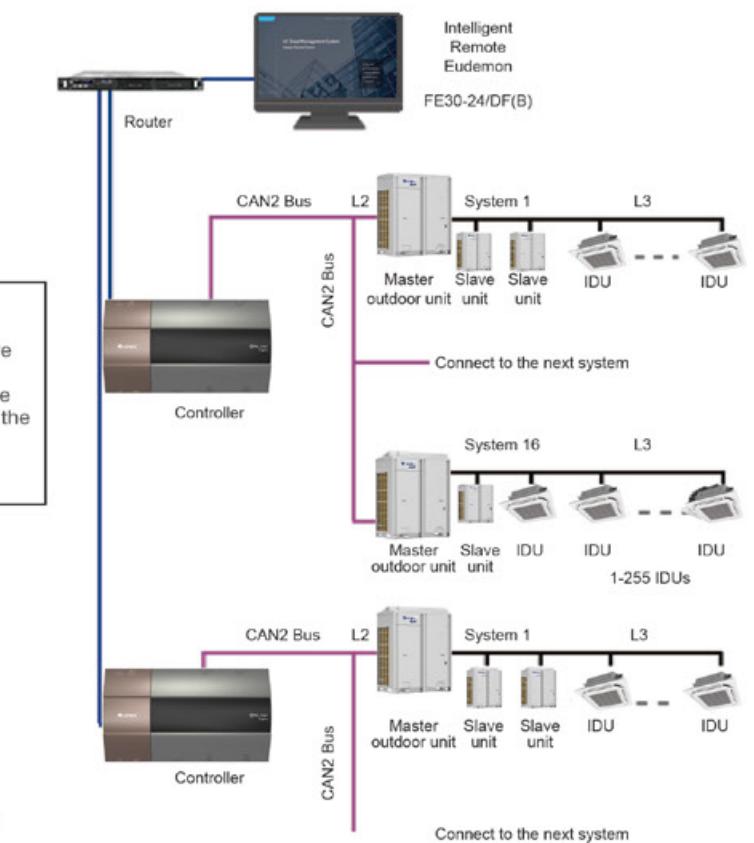

## Intelligent Remote Eudemon

Intelligent Remote Eudemon provides intelligent operation and maintenance services based on the cloud platform, meeting the demands of integrated monitoring of equipment in multiple locations.

Intelligent Remote Eudemon adopts world-leading CAN+ multi VRF unit's communication technology and combines with distributed processing methods to ensure that the system has the characteristics of high availability, easy expansion, and easy networking, and can meet the air conditioning monitoring requirements in multiple scenes.

## Intelligent Assistant

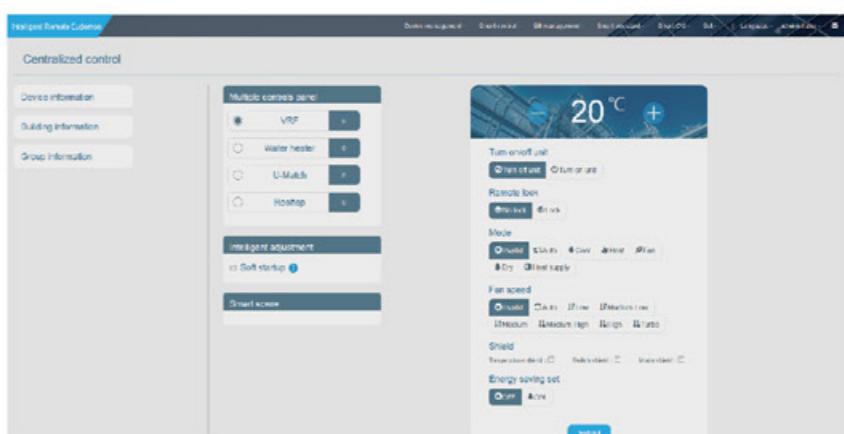

### One-stop Debugging

Support automatic one-stop debugging methods such as one-button debugging and code scanning debugging to achieve automatic synchronization matching, reduce debugging difficulty, and improve efficiency and accuracy.

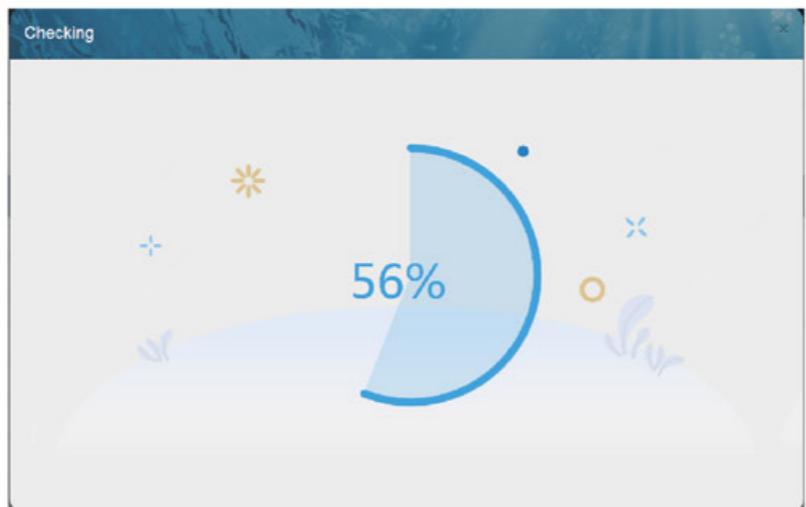

### Soft Start

Delay start of equipment in batches to avoid the impact to the grid in centralized control.

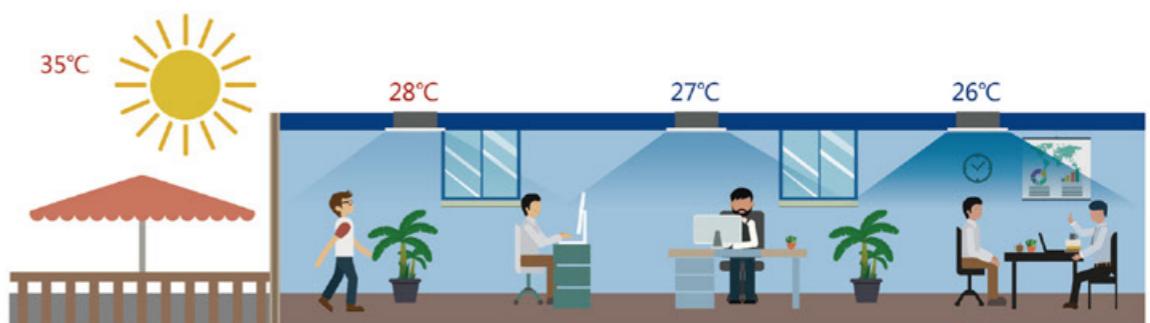

### Intelligent Physical Examination

The equipment status can be understood directly and the user can control the health of the unit by themselves.

### Temperature Field

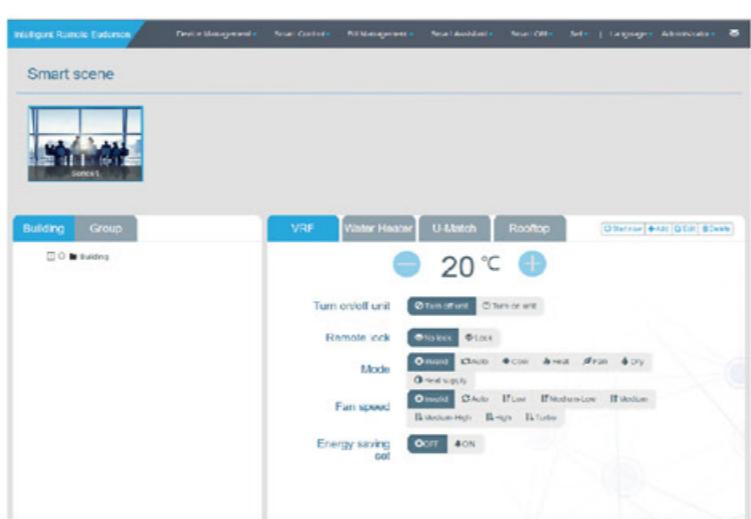

Realize stepped temperature field, gradually adjust the temperature area, prevent sudden cooling or heating, and stay away from air conditioning sickness.

## Intelligent Control

### Smart Scenes

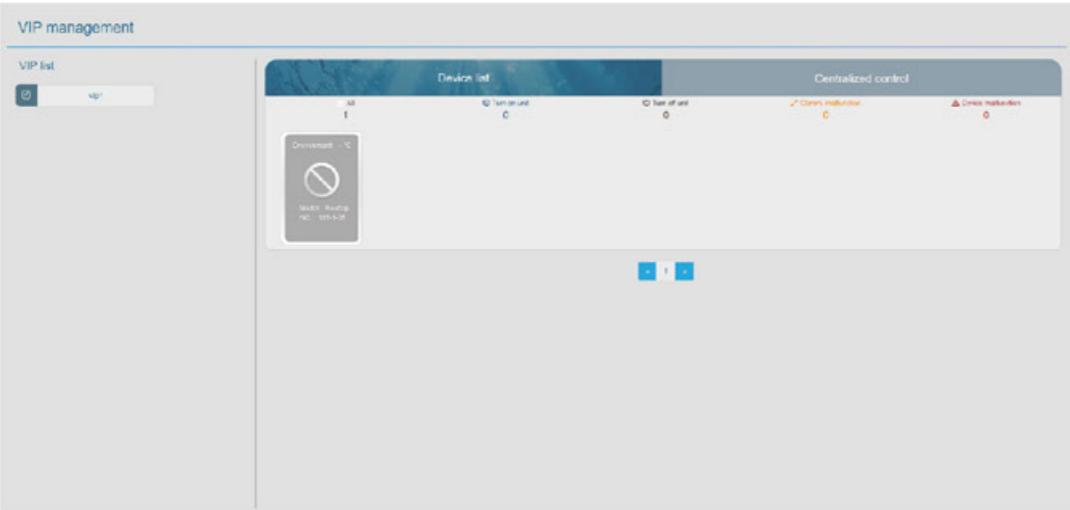

The user can preset a set of parameters according to the needs of life and work (similar to the scene mode of a mobile phone), and then the user can enable and switch with one key, without setting parameters one by one.

## Smart Operation and Maintenance

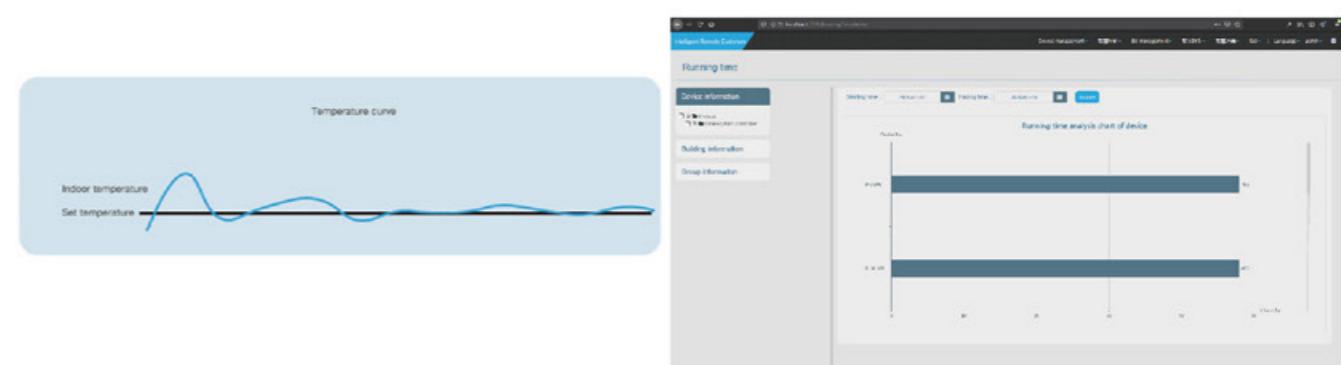

### VIP Exclusive Service

Independent VIP group professional customized service to avoid misoperation and provide a more comfortable environment for the VIP.

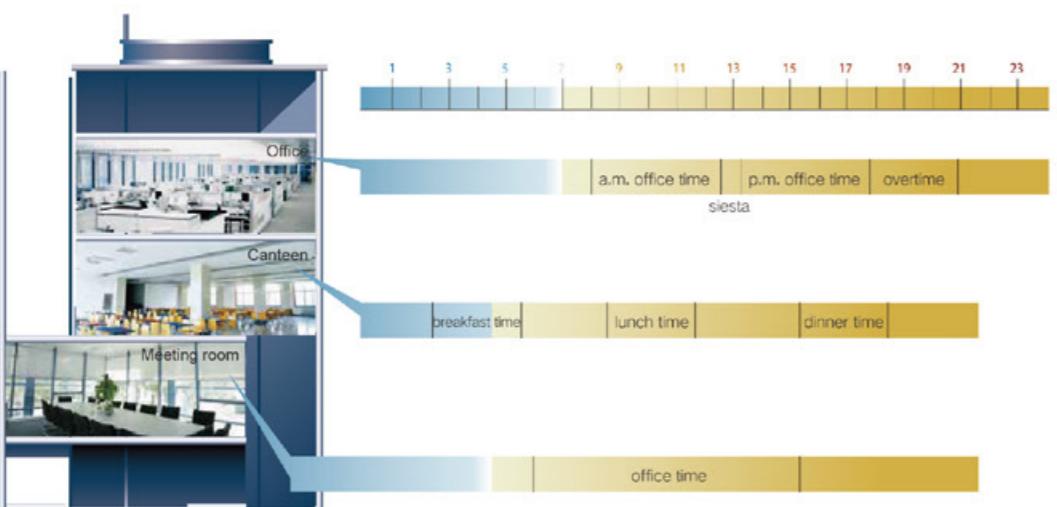

### Green Assistant

Perform statistical analysis on the operating time, set temperature, and indoor temperature, and acquire the actual running status of the equipment in time.

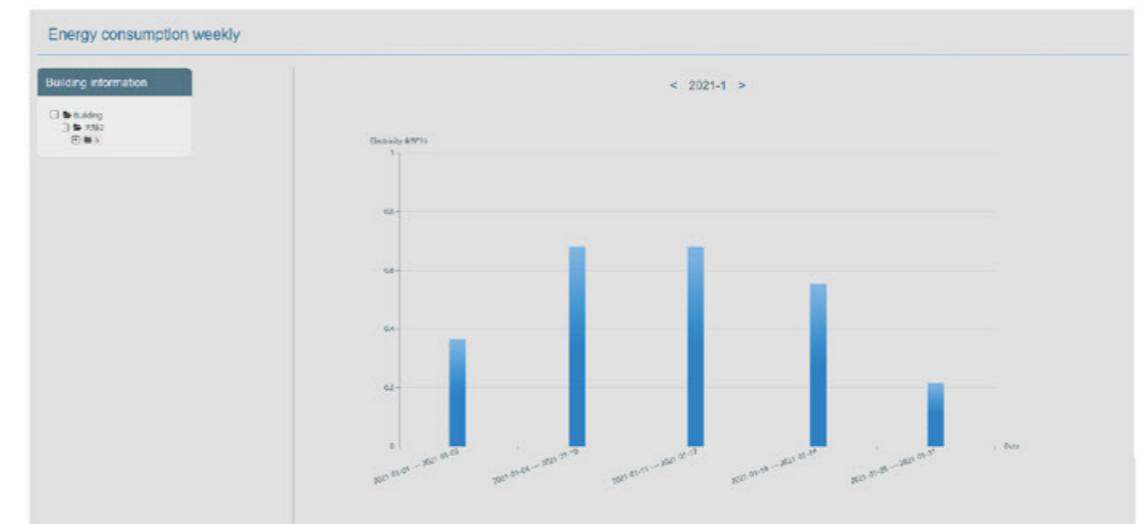

### Schedule Management

Set schedules for different regions and different equipment, execute preset commands automatically, and reduce waste of time caused by repeated operations.

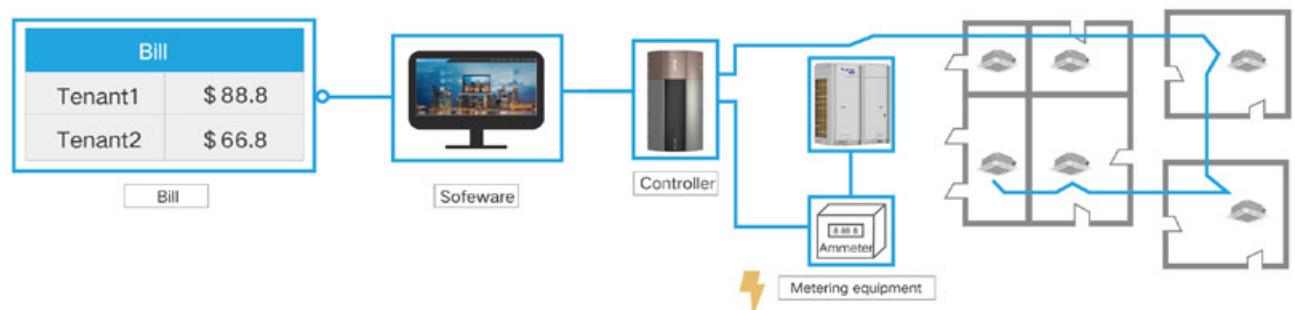

### Weekly Energy Consumption Report

Electricity statistics are carried out on a weekly and monthly basis. The background color is used to reflect the electricity consumption, and the user can accurately control the power consumption of the unit.

## Intelligent Billing

At present, multi VRF system has occupied more than 50% of the market share of central air conditioner, and it is increasing year by year. At the same time, the billing of air conditioner has gradually become the focus of the industry. Due to the differences in the use of air conditioner, it is unfair to adopt the billing method of average sharing, and the collection of multi VRF unit's air conditioning fee has become a difficult problem for property management. Therefore, Gree launched the intelligent billing system for multi VRF units to solve the problems of multi VRF unit's power consumption statistics and users' electricity bill distribution, providing accurate and reasonable billing basis for property management.

### Billing Management

Properly distribute the electricity automatically according to ON/OFF time, mode, set temperature, indoor ambient temperature, outdoor ambient temperature etc.; provide detailed bill, operational details, etc.

### Flexible Bill Export

Provide a variety of bill export modes to achieve free choices and convenient management of bill cycle, distribution mode, and bill type.

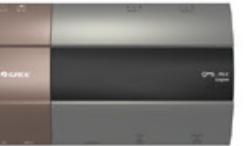

Bill for Air Conditioner				
Room	601			
Time	2016/08/01-2016/08/31			
No.	Equipment	Operation/KWH	Standby/KWH	Subtotal
1	IDU 1	12.5	0.55	13.05
2	IDU 2	11.6	0.21	11.81
3	IDU 3	13.2	0.36	13.56
Total				38.42

### Compatible to Different Electric Meters

No.	Manufacturer	Electric Meter Model	Country of Origin	Satisfactory Regions (reference)
1	ENTES	EPR-04S-96	Turkey	Turkey, Middle East
2	WattNode	WNC-3D-240-MB	America	North America, Latin America
3	Siemens	PAC3200	Germany	Russia, Europe, Asia Pacific
4	Schneider	iEM3255	France	Australia, Europe
5	Waslon	DTS343	China	China

# Building Protocol Gateway

## Modbus Gateway

Name	Model	Key Parameters	Application	Photo
VRF Protocol Gateway	ME30-24/D1(BM)	Capacity: 255 sets of indoor unit (within 16 systems) Protocol: Modbus RTU、Modbus TCP	It is generally used in large buildings such as office buildings, commercial streets, hospitals, and rail transits to connect to BAS to achieve centralized management of air conditioner.	
Modbus Gateway (Mini)	ME30-24/E6(M)	Capacity: 128 sets of indoor units (within 16 systems) Expansion port: No Protocol: Modbus RTU	It is generally used for small and medium-sized projects such as villas and apartment buildings. It is used for docking with BAS systems or smart home systems. Since there is no I/O interface, the capacity is small, and it is a low-cost solution.	
H2M Gateway	ME31-33/EH1(M)	Capacity: 1-16 sets of indoor units Expansion port: No Protocol: Modbus RTU	Generally, it is an intelligent solution for hotel and household environment. The indoor unit directly connects to the controller of the hotel room RCU or the residential smart home system.	

## KNX Gateway

KNX gateway can realize the conversion of multi VRF indoor unit HBS protocol data to KNX protocol data. It is mainly used in hotels, households and other environments to achieve docking with room control units or smart homes.

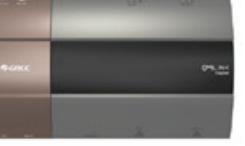

- Standard KNX equipment, easy to install and configure
- Bus power supply, carrier communication
- Preset multiple scene modes and support user self-editing
- Support the monitoring of equipment's status information and error information
- CE, ETL, KNX certificates

Name	Model	Key Parameters	Application	Photo
S2S KNX Gateway	ME30-24/F1(K)	Capacity: 1-16 sets of indoor units Expansion port: No Protocol: KNX	It is generally used in hotels and smart home systems to ensure that the intelligent system directly connects to indoor units and realizes equipment integration in a small area.	

## BACnet Gateway

BACnet features high communication efficiency, flexible protocol and convenient debugging.

Gree BACnet gateway can realize the conversion of multi VRF unit's CAN protocol data into BACnet protocol data, as a bridge for data exchange between air conditioner and BAS.

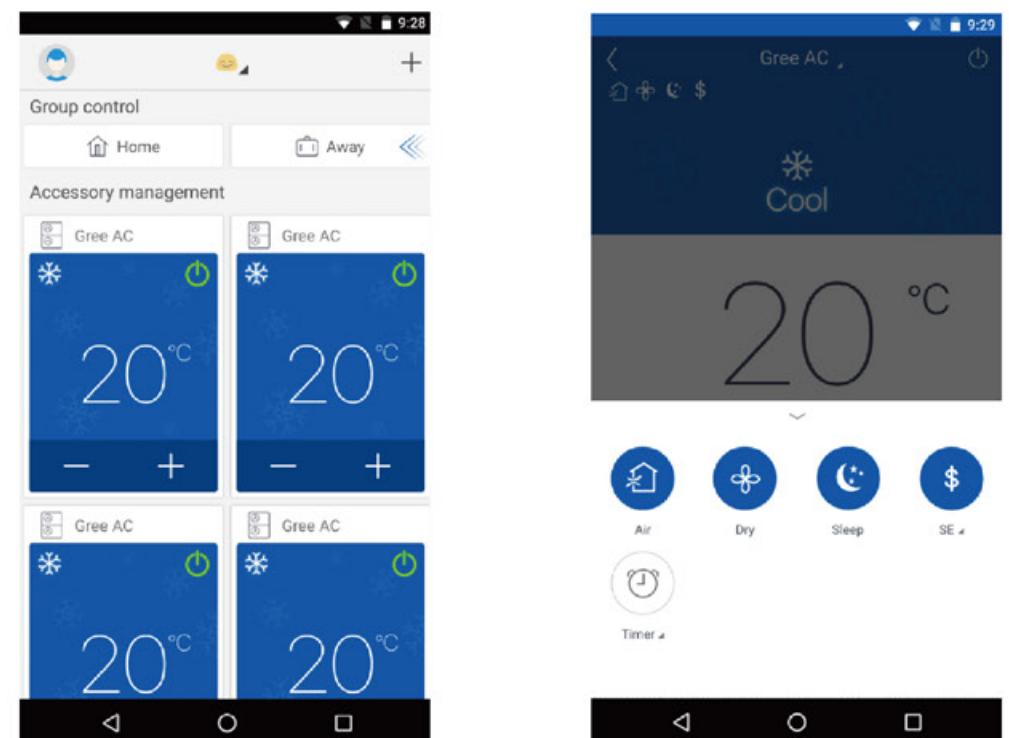

Name	Model	Key Parameters	Application	Photo
VRF Protocol Gateway	ME30-24/D1(BM)	Capacity: 255 sets of indoor unit Protocol: BACnet	Mainly used in the docking of medium and large building automatic control projects.	

# G-Cloud

G-Cloud is a new generation WIFI smart controller of Gree commercial units. It adopts a way of operation different from a remote controller or wired controller. It can display air conditioner running status directly to users, who can conduct point-to-point control over air conditioners through an APP. It is an important part of the Gree smart home. G-Cloud is designed for intelligent home control, such as preset control, long-distance control, scene management, malfunction reminding and family access management.

## System Chart

APP operation chart

- **Lightweight**

Compact and easy to install, no need of external power source; power supplied by equipment, available for use right after connection; a shielded wire of 4 cores is required for connection; easy operation; GREE+APP easy user configuration; quick guidance is provided, with simple and clear display;

- **Smart and long-distance control**

Users can set the running status of the cooling system based on a set of rules; long-distance control allows you to master your home appliances at any time;

- **Capability**

Multi VRF cloud control; one set of device is capable of controlling up to 80 sets of indoor units in a single system; applicable to villas, office buildings, shopping malls, hotels, etc;

- **Sensitive**

Monitor the units and detect errors.

# Wired Controller and Remote Controller

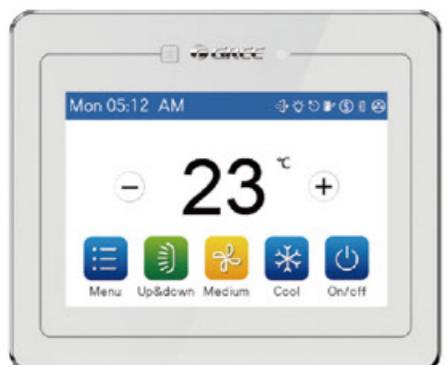

There are two kinds of controllers: a wired controller and a remote controller. The system provides various controls for users, such as cooling, heating, dehumidifying and fan, etc. Users can select it flexibly according to their own using methods.

## Wired Controller XK46

- Moisture-proof design;
- LCD with black background and white words; touch buttons;
- Clock can be displayed and set; 24 hours timer setting for on/off;
- 7 levels of fan speed, up & down swing and left & right swing;
- Can be switched in auto, cooling, dry, fan, heating, floor heating, 3D heating and space heating operation modes;
- Master and slave wired controllers can be set; simultaneous control over several IDUs is available; control max. 16 sets of IDUs at the same;
- Available functions: sleep, ventilation, quiet/auto quiet, light, energy saving, X-fan, memory, low-temperature dehumidifying, absence in heating, filter cleaning reminder, etc.;
- Detect ambient temperature; receive infrared remote controller signal;
- With project parameters viewing and setting functions.

## Wired Controller XK55

- With project parameters viewing and setting functions;
- HD color dot matrix LCD, good-looking and user-friendly;
- 7 levels of fan speed, up&down swing and left&right swing;
- Detect ambient temperature;
- Capacitive touch screen, and supports infrared remote control signal reception;
- Can be switched in auto, cooling, dry, fan, heating, floor heating, 3D heating and space heating operation modes;
- Master and slave wired controllers can be set; simultaneous control over several IDUs is available; can simultaneously control 16 sets of IDUs at most;
- Sleep, ventilation, quiet/auto quiet, light, energy saving, X-fan, memory, low-temperature dehumidifying, absence in heating, and filter cleaning reminder functions can be set;
- Complete timer function, three weekly timers and one countdown can be set simultaneously;
- Under weekly timer function, mode, temperature and fan speed can be preset;
- Simple and decent appearance, bottom case 86 box design for convenient engineering installation.

## Wired Controller XK79

- Small and fashionable appearance with thickness of only 12mm, backlighting LCD with black background and white words, touch buttons;
- Clock can be displayed and set in countdown and clock timer;
- 7 levels of fan speed, up & down swing and left & right swing;
- Can be switched in auto, cooling, dry, fan, heating, floor heating, 3D heating and space heating operation modes;
- Master and slave wired controllers can be set; simultaneous control over several IDUs is available; can control max. 16 sets of IDUs at the same;
- Detect ambient temperature; receive infrared remote controller signal;
- With project parameters viewing and setting functions;
- Door control system can be connected, and door card can control ON/OFF of air conditioner;
- Sleep, ventilation, quiet/auto quiet, light, energy saving, X-fan, memory, low-temperature dehumidifying, absence in heating, and filter cleaning reminder functions can also be set.

## Wired Controller XE70-33/H

- Elegant and concise appearance;
- Touch buttons with back lighting LCD;
- Detect ambient temperature precisely;
- Chinese and English display can be switched;
- With project parameters viewing and setting functions;
- 7 levels of fan speed, up & down swing and left & right swing;
- Applicable to multi VRF air conditioner and fresh air unit with evaporator;
- With service hotline inquiry and after-sales phone number record functions;
- With weekly timer function, multiple weekly timer can be set; under weekly timer function, mode, temperature and fan speed can be preset;
- Master and slave wired controllers can be set; simultaneous control over several IDUs is available; control max. 16 sets of IDUs at the same;
- Sleep, ventilation, quiet/auto quiet, light, energy saving, X-fan, memory, low-temperature dehumidifying, absence in heating, and filter cleaning reminder functions can also be set.

## Wired Controller XE76-33/H

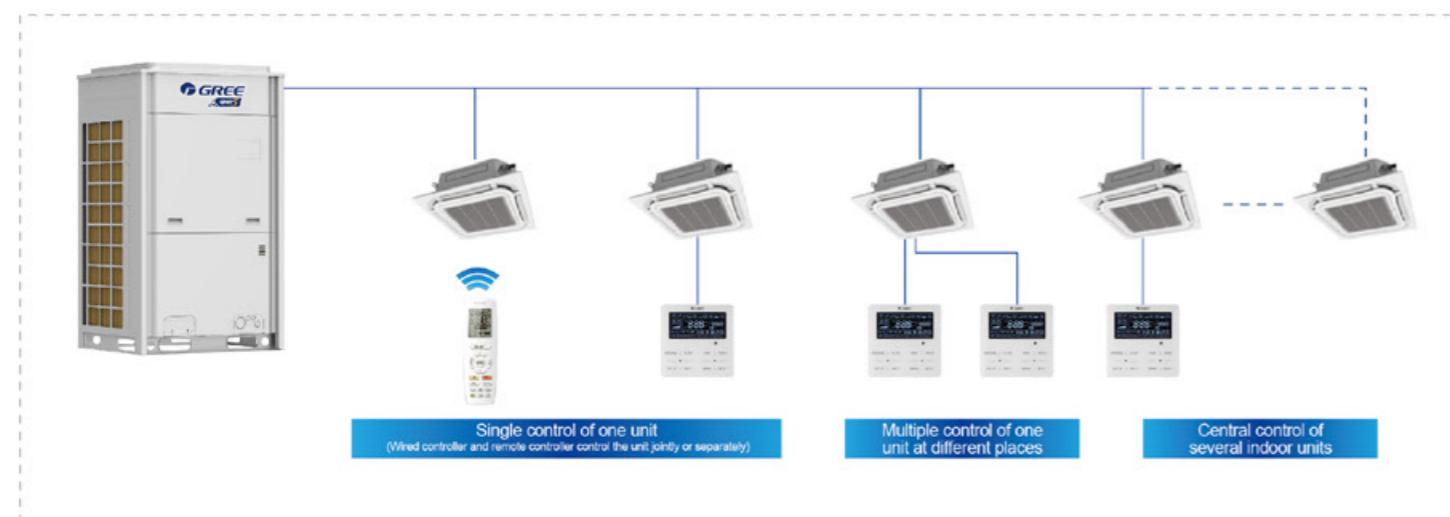

- Elegant and concise appearance;
- Touch buttons with backlighting LCD;
- Chinese and English display can be switched;
- With weekly timer function;
- Complete system functions with each function implemented in an individual page;
- Refreshing, auto dehumidifying, absence and other modes can be set;
- Detect ambient temperature precisely;
- With service hotline inquiry and after-sales phone number record functions;

## Remote Controller YAP1F

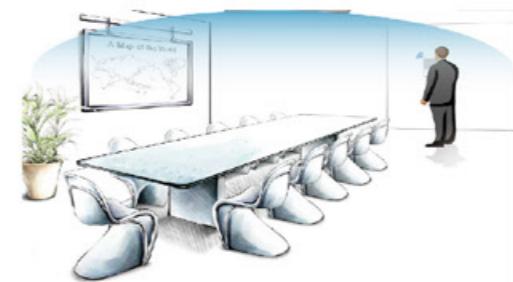

- Can be switched in auto, cooling, dry, fan and heating modes;
- Besides turbo mode, 6 levels of fan speed can be set;
- Up&down swing and left&right swing;
- Available functions: child lock, X-fan, health, ventilation, turbo, sleep, light, absence, I-feel and timer;
- Clock display and indoor/outdoor ambient temperature viewing functions.

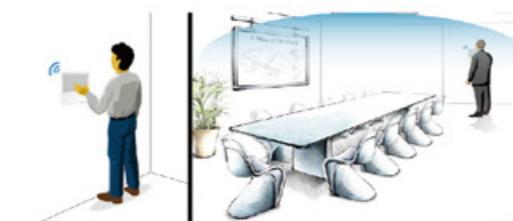

### • Single control of one unit

Each indoor unit has an independent controller.

### • Multiple control of one unit

One indoor unit can be controlled by two wired controllers at different places.

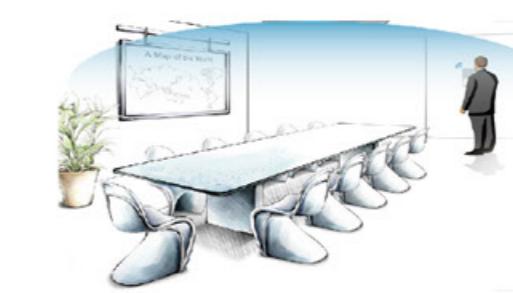

### • Central control of several indoor units

One wired controller can control as many as 16 indoor units.

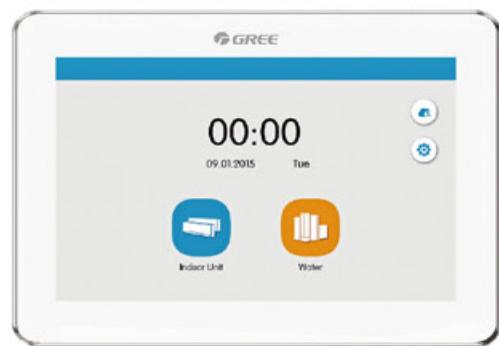

### • Joint control of remote controller and wired controller

Users can control one unit with two types of controllers: a remote controller which is convenient and flexible; or a wired controller which includes every function of an air conditioner.

# Smart Zone Controller and Central Controller

## Smart Zone Controller CE53-24/F(C)

- High-resolution color LCD;
- 7" capacitive touch screen for easy operation;
- Shielding function of a single unit, group and all IDUs (shielding on/off, mode, temp setting, etc.);

- With various functions: centralized control(control all indoor units), group management(support DIY grouping), schedule management(setting of several schedules) and single-unit control(on/off, mode, temp setting, fan speed, quiet, swing control, etc.);
- Provide naming of indoor units, selection of icons and personalized settings(setting background, backlight, etc.);
- Up to 32 units can be centrally controlled;
- Elegant and fashionable appearance;
- Embedded installation in a wall with projecting thickness only of 11mm;
- Connectable with a network of indoor units or outdoor units;
- The independent power supply in 100~240V wide voltage range;
- With project setting, parameter viewing, malfunction record and access management functions.

## E-smart Zone Controller CE54-24/F(C)

- An indoor or outdoor unit network can be connected, simple and flexible;
- 100~240V super wide voltage for independent power supply, stable and reliable;
- With functions of engineering setting, parameters view, malfunction view and authority management, easy for debugging and maintenance.

- Adopt built-in type installation; the exposed part is only 11mm;
  - High-resolution colorful LCD;
  - 4.3-inch capacitive touch screen for easy operation;
  - With single indoor unit control(including general functions and advanced functions), group indoor units control(including general functions and advanced functions), group management(supporting DIY group), single indoor unit and group indoor units timer functions;(general function: ON/OFF, Mode, Set, Fan, Swing, etc; advance functions: Save, Sleep, Absence, Quiet, Turbo, etc)
  - With long-distance shield function (shield switch, mode, set, etc) for a single unit, group and all indoor units;
  - Support denomination for indoor units, and icon selection, realizing individuation management;
- Support maximum of 32 indoor units, with powerful function;

## Centralized Controller CE52-24/F(C)

- With various functions: centralized control (control all indoor units), group management (support DIY grouping), schedule management (setting of several schedules, support special schedule setting such as holiday) and single indoor unit control (on/off, mode, temp setting, fan speed, quiet, swing control, etc.)

- Elegant and fashionable appearance;
- Color LCD, fine display and true color;
- 7-inch capacitive touch screen for easy operation;
- Up to 255 units can be centrally controlled;
- Connectable with network of indoor units or outdoor units;
- Independent power supply in 100~240V wide voltage range;
- Embedded installation in wall with projecting thickness only of 11mm;
- With project setting, parameter viewing, malfunction record and access management functions;
- Shielding function of single unit, group and all IDUs (shielding on/off, mode, temp setting, etc.), long-distance control at will;
- Provide naming of indoor units, selection of icons and personalized settings of centralized controller (setting background, back-light, etc.);

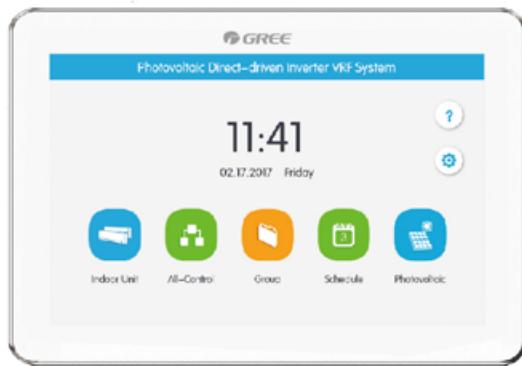

## Commissioning Tool CE42-24/F(C) (Debugger)

- Built-in 4GB storage space;
- 4.3-inch color touch screen LCD;
- Simulate indoor and outdoor unit;
- With complete unit debugging function;
- With indoor unit control and engineering setting function;
- Outdoor unit program upgrade, indoor unit program upgrade;
- With unit decryption function and barcode two-dimensional code display;
- Communication bottom data can be saved and exported by connecting to PC;
- With system status viewing, outdoor unit status viewing, indoor unit status viewing function;
- The single interface is compatible with CAN and RS485 communication, which can automatically identify the communication type.

# Smart Zone Controller and Central Controller

## Power Generation & Consumption Management Central Controller CE55-24/F(C)

- It is white in color, with a round frame. There is only one tangible button on the controller;
- Embedded type installation: The outer part is only 11mm thick;
- The 7-inch super large capacitor type touch screen has a resolution of 1280\*800, clear display, fine images and vivid colors;
- The software operating interface is user-friendly and easy to use. It adopts full touch control, which is very convenient;
- Its two main functions: PV power generation and consumption data management, central control of air conditioning;
- In terms of power generation and consumption management, it provides parameter query (real-time data display of photovoltaic power generation, unit power consumption, grid power supply), power calculation (monthly and yearly calculation), power curve (such as real-time), and power generation and consumption dynamic display;
- The air conditioning central control also provides shielding functions (on/off shield, mode shield, temperature shield, etc.) for a single unit, a group of units and all the indoor units. Remote shield is available. When the shield function is enabled, the wired controller and remote controller of indoor unit will be locked, and only the Power Generation & Consumption Management Central Controller is allowed to be used;
- Directly connected to the network of indoor units; no extra communication module is needed, it is more flexible and convenient;
- Super wide voltage range from 100V to 240V; independent power supply, stable and reliable.

- It is white in color, with a round frame. There is only one tangible button on the controller;
- Embedded type installation: The outer part is only 11mm thick;
- The 7-inch super large capacitor type touch screen has a resolution of 1280\*800, clear display, fine images and vivid colors;
- The software operating interface is user-friendly and easy to use. It adopts full touch control, which is very convenient;
- Its two main functions: PV power generation and consumption data management, central control of air conditioning;
- In terms of power generation and consumption management, it provides parameter query (real-time data display of photovoltaic power generation, unit power consumption, grid power supply), power calculation (monthly and yearly calculation), power curve (such as real-time), and power generation and consumption dynamic display;
- Regarding the central control of air conditioning, it provides multiple control modes, including central control (overall air conditioning), group management (supports user-defined group management), schedule management (settings for different schedules, such as holidays), and single-unit control (power on / off, mode selection, temperature setting, fan speed adjustment, sound adjustment, air volume setting, etc.);
- Support indoor unit naming, icon selection and personalized settings of the central controller (background setting, sound setting, etc.);
- Can connect max. 16 sets of PV Direct-driven Inverter Multi VRF Systems, and can use max. 128 air conditioning units;

## 24V Converter ME32-33/H

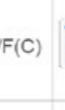

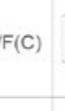

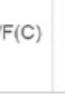

- Simple appearance, moisture-proof structure;
- Various interfaces: 1 set of third-party controller signal interfaces and 4 sets of dry contact signal interfaces;
- Signal conversion of a third-party controller: convert the control signal of 24VAC HVAC Thermostat into the control signal of GMV5. In this way, a third-party controller like 24VAC HVAC Thermostat can control our GMV5 units;
- Fire alarm and other dry contact signal detection: it is used to detect fire, external water tray overflow, etc. so as to shut down the air conditioner in time to protect property and people.

FQ18/H1	Gas pipe	
	Liquid pipe	
FQ18/H2	Gas pipe	
	Liquid pipe	

Note: Above dimensions are engineering piping dimensions.

Total rated capacity of downstream indoor units X(Btu/h)	Upstream connection pipe dimension		Model of manifold pipe
	Gas pipe (inch)	Liquid pipe (inch)	
X≤136,000	≤Φ1	≤Φ1/2	FQ14/H1
136,000<X≤232,000	≤Φ1-1/8	≤Φ5/8	FQ18/H1
232,000<X	≥1-1/4	≥3/4	FQ18/H2

## Branching Joint (For GMV5 HR)

### For Outdoor Units and Mode Exchanger

Model	Total capacity of the downstream indoor unit X(Btu/h)	Appearance		
		High-pressure gas pipe	Low-pressure gas pipe	Liquid pipe
FQ01Na/A	X≤17,100			
FQ02Na/A	17,100<X≤76,400			
FQ03Na/A	76,400<X≤95,500			
FQ04Na/A	95,500<X≤232,000			
FQ05Na/A	232,000<X≤327,500			
FQ06Na/A	327,500<X≤460,600			
FQ07Na/A	460,600<X			

Note: Above dimensions are engineering piping dimensions.

### For Indoor & Mode Exchanger

Model	Total capacity of the downstream indoor units X(Btu/h)	Appearance	
		Gas Pipe	Liquid Pipe
FQ01A/A	X<68,000		
FQ01B/A	68,000≤X≤102,000		

Note: Above dimensions are engineering piping dimensions.

### For Outdoor Units

Model	Module's capacity X(Btu/h)	Appearance		
		High-pressure gas pipe	Low-pressure gas pipe	Liquid pipe
ML01R	X≤327,500			
ML02R	327,500<X			

Note: Above dimensions are engineering piping dimensions.

Branching Joint ( For AHU KIT)	
Model	Appearance Liquid Pipe
FQ02U/A	

Note: Above dimensions are engineering piping dimensions.

Reducer/Expander Pipe Dimensions			
CF333(54/45)	CF334(41/38)	CF335(35/32)	CF336(35/29)
CF337(29/25)	CF338(26/22)	CF339(26/19)	CF340(19/16)
CF341(16/13)	CF342(13/10)	CF343(13/6)	CF344(10/6)
CF345(13/16)	CF346(16/19)	CF347(19/22)	CF348(23/25)
CF349(29/32)			

Note: Above dimensions are engineering piping dimensions.
